

Fastmarkets Dashboard

Release notes

December 2023

What's New?

New features

This release introduces a change to the display of pricing in the Fastmarkets Dashboard. Previously, by default, Dashboard Price Chart and Historic Price Table widgets displayed the symbol in the header or legend. In response to customer feedback, this release will provide the ability to display the price description (name) on two Dashboard widgets as well as corresponding Excel exports. This feature will introduce the following benefits:

- Quickly providing a clear understanding of which prices are displayed
- Allowing different widget configuration options

This new functionality to select whether to display symbol or description will include:

- A dropdown menu for selection being introduced to the Price Chart and Historic Price Table widgets
- The ability to export data to Excel exactly as displayed in the Dashboard widgets
- Any new widgets created will display the price description by default
- Any existing widgets already created within workspaces or Market Pages will continue to display symbol but can be amended after this release

Price description/symbol selection in the Price Chart and Historic Price Table widgets

By default, when a Price Chart or Historic Price Table widget is created, the price description will be displayed by default in the header or legend instead of the symbol. Any existing widgets will continue to be display the symbol, but this can now be changed.

By clicking on the drop-down menu at the top of the widget, select between symbol and description as the display option:

Price Chart widget

In the Price Chart, this will be reflected on both the Line Chart and Data Table as well.

Display options when exporting prices to a Microsoft Excel spreadsheet

When exporting prices from a widget to Microsoft Excel using options **Copy for Excel add-in**, **Copy values only**, **Comma-separated values (.csv)** and **Microsoft Excel (.xlsx)**, your spreadsheet will display both the price symbol and description in the column header.

Copy values only:

Title	Lithium
