

Fastmarkets Dashboard Release Notes

November 2023

What's New?

New Features

This release of the Fastmarkets Dashboard includes the following new functionality and features:

- **New – New York Mercantile Exchange (NYMEX) West Texas Intermediate (WTI) Crude Oil Futures** – live and delayed futures contract pricing

NYMEX WTI Crude Oil futures

This release will add new pricing for NYMEX WTI Crude Oil futures contracts to the Dashboard. This adds to our suite of energy data where we also cover NYMEX NY Harbor ULSD and Natural Gas contracts. NYMEX is an exchange brand under the umbrella of the Chicago Mercantile Exchange Group (CME).

The live and end of day settlement prices for WTI Crude Oil futures are available for fixed contract months, this means that each contract month will have a dedicated symbol e.g. XN-CL-FS23 for the December 2023 contract month. These contract months will expire and the next contract month (next symbol) would need to be added to your Dashboard workspace or widget.

These new contracts are available in the Multi Price Table, Historic Price Table, Price Chart and Single Price tile widgets.
