

Fastmarkets Dashboard Release Notes

3rd December 2019

Version 1.4.917

What's New?

New Features

The key feature in this release is the improved user experience around article links. Previously, all article links directed the user back to Metalbulletin.com or AMM.com. Now, all news or price links open directly in the Dashboard in a new window. This change doesn't affect external links (e.g. lme.com) which still open in the user's default browser.

Other improvements include the ability to export or copy the historic price widget into Excel, enabling key word search in News alerts, improvements to the market pages based on input from the Editorial team.

Bug Fixes

The white screen issue has been fixed that users experienced when leaving computers logged in overnight or switching between docking stations. Some users experienced issues around installing the desktop version which has been fixed. Also, Chrome users reported blank market pages which is now fixed.

Breaking Changes

There are no breaking changes with this release.

Previous Versions

| Fastmarkets Excel Add Version | Release Date |
|--------------------------------------|---------------------|
| Fastmarkets Dashboard v1.4.762 | 24/10/2019 |
| Fastmarkets Dashboard v1.4.819 | 5/11/2019 |
